BRAND	MODEL/PART NUMBER	Equipment / Device Type	LOCATION	Deficiency Identified	Observations / Comments	Severity	QTY
BRAND	MODEL/PART NUMBER	Inspection Parameter	-	Assessment/Status	Observations / Comments	HIGH/LOW	QTY

1. **YELLOW HIGHLIGHTED** - All fields should support drop-down selection, with a dedicated Settings module to add, edit, or delete drop-down options.
2. **BLUE HIGHLIGHTED Title Fields** - Manual entry only in **RED TEXT** shows (for reference red color).
3. **Assessment/Status** - All fields should support drop-down selection, with a dedicated Settings module to add, edit, or delete drop-down options.
4. **Assessment / Status** – If any status other than "Good" is selected (e.g., Faulty, Missing, Damaged, Inoperative, Obstructed, Offline, etc.), the system shall automatically classify the item as a Deficiency Identified (DI).
The selected status and related inspection details shall be automatically recorded in the Deficiency Identified (DI) section without requiring manual data entry.
5. **Inspection Category – "Others" Option** – If the user selects "Others" as the **Inspection Category**, the **Equipment / Device Type** field shall automatically switch from a drop-down list to a **manual text entry** field, allowing the user to enter a custom equipment or device type.
6. **Grey Highlighted Fields** – Represent the Inspection Category (e.g., Initiating Devices).
Orange Highlighted Fields – Represent the Equipment/Device Type (Subcategory) (e.g., Smoke Detector, Heat Detector, and Manual Call Point).
A dedicated Settings Module shall be provided to manage the hierarchy, allowing users to:
Add, Edit, and Delete Inspection Categories.
Add, Edit, and Delete Equipment/Device Types under each Inspection Category.
Associate multiple Equipment/Device Types with a single Inspection Category.
Display the associated Equipment/Device Types as a dependent drop-down list when the corresponding Inspection Category is selected.

Inspection Parameters = Equipment / Device Type For mapping.
